DISTRIBUTION OF RAW MATERIALS TO THE RUBBER AND PLASTIC INDUSTRY

European Funds
for Łódzkie region

Republic
of Poland

Co-funded by the
European Union

ABOUT US

Our company has been founded in the city of Lodz in 1994.

Many years of successful business activity have solidified our position on both domestic and foreign markets as a distributor of raw materials and products mainly for the rubber and plastic industry.

The cooperation with the world's biggest chemical corporations allowed us to ensure the highest quality of products in our portfolio throughout the years. Basing our activity on partnership relations with both producers and end users we are able to conduct mutually beneficial business.

Our goal is to offer not only professional trade services but also, based on long-term experience, technological support and solutions that guarantee a steady rise in competitiveness.

A very important part of our activity is the custom-made repackaging of raw materials. This service is realized, taking all required security precautions into account.

We own a specialized class A warehouse that provides the highest security and appropriate storing conditions for all the materials.

Adhering to ISO 9001:2015 standards and procedures of waste management allows us to meet even the most strict quality, security and environmental requirements.

We would also like to point out that all the substances and mixtures within the product range of Torimex Group Sp. z o.o. fully comply with the obligations arising from the REACH regulation.
